RESEARCH FOCUS

My research focuses on the intersection of human-computer interaction (HCI) and machine learning (ML), where I design full-stack AI systems to assist humans with everyday tasks. This includes collecting and curating data from real users for targeted applications, creating interactive systems for embodied AI assistance, and evaluating these approaches.

‘ Areas of Interest: Human-AI Interaction; Multimodal AI Agents; Pervasive Augmented Reality; Generative AI.

PROFESSIONAL EXPERIENCE

2022/2023 **Meta Reality Labs**, Research Scientist Intern. Toronto, Canada
Mentor: Tovi Grossman, Yan Xu

Developed OmniActions [F.7], a *multimodal pipeline* powered by LLMs that predicts users' follow-up actions when interacting with real-world multimodal information.

Crowdsourced data for coding the design space of follow-up actions via a diary study.

Performed empirical evaluation on *finetuning* and *in-context learning* of the language model.

2021 **Adobe Research**, Research Intern. San Jose, CA
Mentor: Li-Yi Wei, Rubaiat Habib Kazi, Stephen DiVerdi
Developed an interactive creativity-support tool designed for crafting AR effects using physical objects. Filed a *patent* for this work [P.3].

2022 **Igarashi Lab at University of Tokyo**, Visiting Ph.D. student Tokyo, Japan
Supervisor: Takeo Igarashi
Built a data collection pipeline for 6D pose estimation of physical objects.

2019 **PARC, A Xerox Company**, Research Intern. Palo Alto, CA
Mentor: Erva Ulu, Nurcan Ulu Developed an interactive tool to generate supporting materials with varying density. Filed two patents for this work [P.1, P.2].

2018–2019 **DMAI Inc.**, Part-time Robotic Design Engineer. Los Angeles, CA

2018–2023 **UCLA HCI Research**, Research Assistant. Los Angeles, CA

EDUCATION

2018–2024 University of California, Los Angeles
Ph.D. in Mechanical Engineering (with a focus on Human-Computer Interaction)
Advisor: Xiang ‘Anthony’ Chen

2017–2018 University of California, Los Angeles
M.S. in Mechanical Engineering

2013–2017 Shanghai Jiao Tong University
B.E. in Naval Architecture and Ocean Engineering

[P.2] Nurcan Gecer, ULUErva ULU, Walter Hsiao, **Jiahao Nick Li**. Controller and 3D printing apparatus for varying density support structures through interpolation of support polygon boundaries with scalar density fields. *US Patent 11654616B2*.

[P.1] Nurcan Gecer, ULUErva ULU, Walter Hsiao, **Jiahao Nick Li**. Interactive design tool for varying density support structures. *US Patent 11639023B2*.

SKILLS

I am proficient in building interactive AI systems with full-stack web development, including both frontend and backend. I am also experienced in designing, training and evaluating deep learning models and large foundation models.

Programming: Python, C++, HTML/CSS/JavaScript, Kotlin, Swift, Pytorch, Tensorflow, Flask, React.js.

Development Technologies: CUDA, Unity, Robotic Operating System (ROS).

Machine learning techniques: Vision-language representation learning, Supervised CNNs, Contrastive Learning, Finetuning of pre-trained language models, etc.

Research Methods: Data collection design, Data curation, Open coding.

SERVICE

Organizing

2024-2025 **Proceedings Co-Chair**. ACM UIST.

2022 **Student Volunteer.** ACM CHI.

Program Committee

2024 **Associate Chair**, ACM UIST.

2020-2021 **Associate Chair**. ACM CHI Late-Breaking Work.

Reviewing

2019–2024 The ACM Symposium on User Interface Software and Technology (UIST).

2020–2024 The ACM Conference on Human Factors in Computing Systems (CHI).

2023 The ACM Special Interest Group on Computer Graphics and Interactive Techniques (SIGGRAPH) Poster

INVITED TALKS

2023 "Making Everyday Objects Physically Interactable with Robotic-augmented Sensing and Actuation."
Dynamic Graphics Project (DGP), University of Toronto (hosted by Bryan Wang).

2022 "Making Everyday Objects Physically Interactable with Robotic-augmented Sensing and Actuation."
Acuated Experience Lab (Ken Nakagaki) and Human Computer Integration Lab (Pedro Lopes), University of Chicago (hosted by Yudai Tanaka).
Purdue University (hosted by Liang He).

PRESS COVERAGE

Keynote and Plenary Addresses

2019 **New Scientist.** Turn any object into a robot using this program and a 3D printer.

Hackster News. Robiot Is a Design Tool That Generates Mechanisms to Motorize Everyday Objects.

Fabbaloo. Robiot Can Automatically Design Handy Household Machines.
